

HYUNDAI

Display Solutions by Expertise.

More than just a Display.

Advanced Display Solutions 2012

More than 25 Years HYUNDAI IT

In 1986 the production of the first HYUNDAI display – a 12" monochrome CRT monitor – started. Since that time display technology has been developed enormously. And so did HYUNDAI IT and the brand name HYUNDAI has been synonymous with the design and production of state-of-the-art display technologies. Advanced devices offering sophisticated design and supreme image quality – with "built-in" future-proofing.

More than just a Display

The innovative display solutions from HYUNDAI IT profit by 25 years experience in display development. Based on a smart and reliable product design they are offering a load of optional features that makes them suitable for any use case of today's business. That's how they bring add-on values and thus a maximum customer satisfaction. That's what them makes more than just a display.

- Metal Frame Housing
- DOOH Media Panel
- Wide Viewing Angle
- High Brightness/Contrast
- Full-HD/HD-Ready
- Portrait/Landscape Orientation
- Integrated Video Wall Function
- High Connectivity
- Auto-Cooling System
- Remote Control + Monitoring
- VESA Wallmounting
- Auto Power Control (DPMS)
- Speaker-Ready

BASIC

OPTION

- Tempered Glass
- Touch Screen
- Transflective Panel
- LED Backlight
- Optical Bonding
- Anti-Blackout Panel
- Anti-Reflection Coating
- Anti-Graffiti Protection
- UV Protection
- Auto-Brightness Sensor
- Motion Sensor
- Ultra Narrow Bezel
- Open Frame Design
- Tailored Product Design

Indoor Displays

Touch Screen Displays

Semi-Outdoor Displays

Interactive Whiteboard

Stereoscopic 3D Displays

Outdoor Displays

HYUNDAI IT's public displays ensure the presentation of digital signage contents in a pin sharp, high bright and brilliant picture quality. Meeting all technical requirements for professional display equipment these enhanced displays allow a reliable and failure-free operation.

Metal Frame Housing

A solid metal frame housing guarantees that the panels of HYUNAI IT's public displays are well protected especially when it comes to public area installations. In addition, the metal frame gives the product a high quality and an appealingly optical appearance.

Professional DOOH LCD Panel

Using commercial grade LCD panels for Digital Out-Of-Home applications the HYUNDAI IT public displays have a higher brightness and contrast than standard LCD TV panels. Also those panels enable permanent operation and deliver clear and bright images. They can be used in both portrait as well as landscape orientation without any losses of quality.

High Brightness & Contrast

Achieving a brightness from 450 to 1500 cd/m² and working with a smart dynamic contrast technology, the special Out-Of-Home panels ensure bright and sharp pictures with a facsimile depth, even in bright enlightened environments.

Full-HD Resolution FullHD HD ready

Having a resolution of either 1366 x 768 or 1920 x 1080, HYUNDAI IT public displays can display high-resolution and more data information on the LCD screen by an aspect ratio of 16:9. The Full-HD resolution enables brighter and sharper images if HD graphics and videos can display.

Wide Viewing Angle

The wider the panel's viewing angle is the more viewers are able to see the contents in a high quality. That matters for both meeting environments as well as public area installations. Coping with a wide viewing angle of 178° (h/v) HYUNDAI IT public displays bring the content to the entire audience.

Fast Response Time

A fast response time of 8ms ensures the displaying of a clear image quality without ghosting effects for any fast moving video or image content.

High Connectivity

Providing an array of various professional input and output connectors [HDMI, DVI, Component/Composite (BNC), VGA] HYUNDAI IT Digital Signage afford an easy, flexible and multiple connection to a broad range of external A/V devices.

Heat Control & Cooling System

In order to avoid any image corruption or downtime by overheating HYUNDAI IT Digital Signage Displays are equipped with an innovative built-in fan & heat control system, which makes the displays ready for the operation in any climatic environment.

Remote Control (RS232C)

For an easy set-up and maintenance the built-in RS-232C port allows the remote controlling and configuration of the display's functions.

Wall Mounting

Wall mounting holes according to the VESA standard (Flat Panel Mounting Interface Standard) ensure the compatibility and thus an easy installation with universal wall-mounting brackets.

Key Facts

Advantages:	Available Sizes:
• robust metal frame housing	• 48.3 cm / 19"
• DOOH media panel	• 58.4 cm / 23"
• high connectivity	• 81.3 cm / 32"
	• 101.6 cm / 40"
Typical Installations:	• 116.8 cm / 46"
• shops, malls	• 119,4 cm / 47"
• conferencing, education	• 139.7 cm / 55"
• fairs & events	• 177.8 cm / 70"
	• 208.3 cm / 82"

Due to the built-in video wall function HYUNDAI IT's MultiVision Displays are dedicated to installations of multi-screen walls of up to 5 by 5 single units (9x9 with amplifier). For this reason no additional expensive equipment, like video split processors, is necessary.

Daisy Chain Connection

In order to realize a multi display wall, the single units are linked by a Daisy Chain connection over HDMI, Component or the D-Sub interface. This implicates that just one display (master unit) needs a direct connection to the video source. The configuration of each display, regarding its individual ID and position in the matrix, can be easily set-up using the on-screen menu or the RS232C interface. The built-in video wall function allows flexible configuration and easy installation.

Ultra Narrow Bezel Design

Coming with an ultra narrow bezel design, HYUNDAI IT's MultiVision displays are dedicated to build video walls. Combined with the cutting edge function – which allows displaying the full picture content – the smart design of the HYUNDAI public displays ensures a maximum screen area with a minimum of viewable interruptions.

D468FL

Ultra Narrow Bezel

Key Facts

Advantages:

- ultra narrow bezel
- built-in video wall function

Available Sizes:

- 101.6 cm / 40"
- 116.8 cm / 46"
- 139.7 cm / 55"

Typical Installations:

- shopping mall
- airport, rail station
- sportsbar, museum

As an option, HYUNDAI IT public displays can be equipped with touch screen functionality. According to screen size and the kind of application, different touch screen technologies are used: infrared ray matrix, 5-wire-resistive or capacitive technique.

Single/Dual Touch Control

Beside single touch mode HYUNDAI IT's touch screens provide dual touch control. This enables gesture control, like "Zoom", "Rotate", "Two-Finger-Tap" etc.

D465MLI

G75TR /G95TR

Key Facts

Advantages:

- HID Compatible
- robust design

Available Sizes:

- 48.3 cm / 19"
- 58.4 cm / 23"
- 81.3 cm / 32"
- 101.6 cm / 40"
- 116.8 cm / 46"
- 132.1 cm / 52"
- 139.7 cm / 70"
- 208.3 cm / 82"

Typical Installations:

- information kiosks
- self-service terminals
- conference & education
- monitoring & control

WideVision

The WideVision displays of HYUNDAI IT are characterized by their special aspect ratio whose height is less than half of its width. This brings the benefit that they will fit where displays with standard height can not be installed.

C430ML

Open Frame Displays

For an easy integration of public displays to furnitures and other housings, HYUNDAI IT provides Open Frame Displays that feature reduced outline dimensions and special mounting fixtures.

Open Frame Display

Tempered Security Glass (Option)

In order to protect the displays against vandal attacks and thus avoiding additional costs during the operational period it is possible to cover the screens with a tempered security glass.

Tailored Display Solutions

Thanks to the long lasting experience in developing displays and a high flexibility, HYUNDAI IT is able to manufacture tailored display solutions, which are customized regarding to form, function and design. special mounting fixtures.

Tailored Display - Peugeot

HYUNDAI IT's Stand-Alone Displays are the best solution for single screen information signage. Combining dynamic screen contents and the static depiction of corporate identity, they bring the maximum brand communication to the point of information.

Full Protection

In order to protect the high-tech components and ensure a long life time, the housing is fully made of steel and can be locked. The panel is protected by a special tempered glass.

Touch Screen Function (Option)

Optionally, the Stand-Alone Displays are available as touch screen models. The used infrared touch screen technology ensures maximum controlling comfort and makes them ready for a lot of interactive applications.

D467SL

Key Facts

Advantages:

- easy installation
- robust housing
- easy individualization

Available Sizes:

- 116.8 cm / 46"
- 132.1 cm / 52"
- 177.8 cm / 70"

Typical Installations:

- information kiosks/terminal
- lobby, entrance area
- stores

High-Temperature Panel

HYUNDAI IT's new high-temperature panel is ready to operate in conditions of up to 105° C. This prevents so called "blackouts", caused by overheating, and makes it suitable for installation sites which are characterized by high temperature and bright ambience or direct sun light.

High Temperature Panel

Transflective Panel

The transflective panel technology is a combination of both the conventional backlight transmissive mode as well as the reflective mode. By using a rear reflector behind the panel, sunlight reflections increase the display's brightness of up to 3000 cd/m² (at 80 K lux).

Transflective Panel

Optical Bonding

By using the Optical Bonding technique, the displays front glass is directly bonded to the LCD panel. This leads to the advantage that glare and reflection on the screen are reduced to a minimum while brightness and contrast ratio are increased at the same time. Furthermore glass fogging and sedimentation of dust is prevented.

Optical Bonding

With a series of ecological features HYUNDAI IT is on target to provide environment-friendly products which reduce power consumption, especially when it comes to permanent operations of digital signage installations.

Motion Sensor (Option)

For installation sites where contents only need to be displayed on demand (e.g. information terminals), motion sensor is suitable to reduce power consumption and extend the panel's life time. Thereby the motion sensor detects human motion inside a defined periphery around the display. If there is no motion detected, the display automatically switches to stand-by mode.

Auto Brightness Sensor (Option)

An integrated light sensor that measures the ambient light takes care that panel's brightness will be adjusted to the ambient lighting conditions. As a result the power consumption will be reduced while the panel's lifetime will be increased.

Transflective Panel (Option)

With a reflector behind the panel a transflective panel uses the sunlight to increase the display's brightness.

LED Backlight (Option)

HYUNDAI IT's public displays with LED backlight bring the advantage of an up to 40% lower power consumption, compared to displays with CCFL backlight. The LED backlight also enable a super-slim design which is accented by a glossy narrow bezel.

Super-Slim Design

VESA DPMS

In order to reduce power consumption, the auto-power-control of the VESA DPMS standard ensures, that the display will be switched to stand-by mode if there is no signal input.

RoHS Compliant

With the compliance of the RoHS directive of the European Union, HYUNDAI IT guarantees that there are no hazardous substances used, which will polluting the environment after the product's life cycle.

The HYUNDAI IT Interactive Whiteboard is a large LCD display with touch function that is dedicated to a variety of educational settings, like classrooms. In combination with a PC and special software it provides a lot of interactive functions that can be controlled by finger, pen, stylus or similar devices.

Larger picture design

Designed for larger picture size, compared with same inch of other competing products. Compared with other competing products, larger design of picture size was realized which makes it enlarged by 80mm (W) x 70mm (H). This can help users do writing even on every end edge of picture, which is the most unique feature in the world.

A big bright education

With a large screen size of 82" and high brightness levels with 450nits, E82AMAC LCD e-board delivers high-quality images even in brightness 1nit room.

Optical touch technology

Camera based optical technology applied. So it is stronger, quicker and more reliable compared with other technologies. Connect it to a desktop, double-click a program with a stick, enjoy surfing the internet with a pointer and play simple games with user's own finger.

Reliable durability

Life span on LCD panel comes to approximately 50,000 hours (about 17 year) when used 8 hours a day.

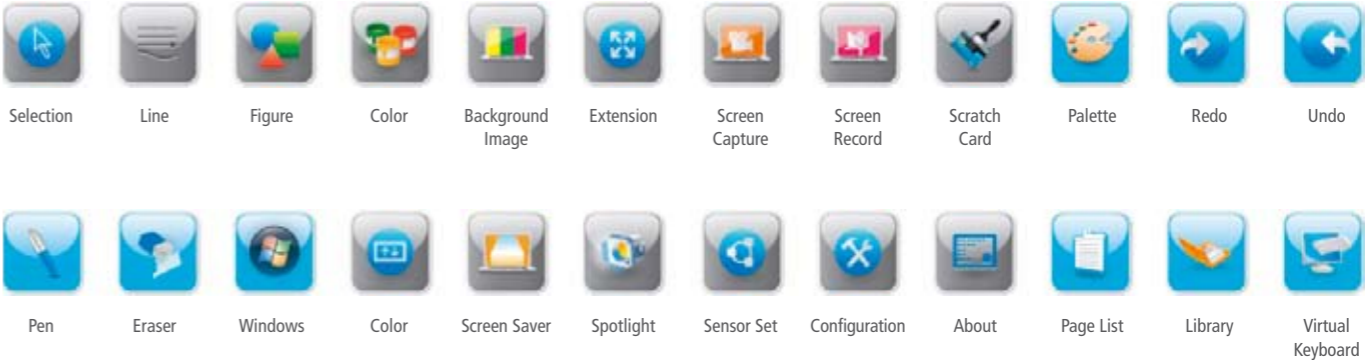

Clearer, more accurate and more elaborate picture quality

When using interactive white board indoors, employing anti-glare to disperse light such as fluorescent lamp helps keep clearer picture quality which can lead to enhanced product quality. Besides, it is possible to do a fine design of plaster figure owing to optical touch sensor, featured to create the same environment as drawing a picture on a drawing paper.

State-of-the-art technology for creation of larger picture size

Designed with larger picture size by 80mm, compared with that of competing products. The unique design created secure 40mm of hidden picture size enables users to do writing even on the innermost edge.

Software applied with UI of smart phone

In addition to conventional 2D operations, HYUNDAI IT's stereoscopic 3D displays make it possible to watch 3D images with a breathtaking three-dimensional effect. For example 3D models created with CAD software can be displayed more plastically and thus allow a presentation close to reality. Beside professional applications the 3D displays are also suitable for multimedia operation such as 3D games, movies or pictures.

A New Dimension in Display Technology

Based on the stereoscopic 3D technology the viewer watches the 3D contents on a polarized 3D display by wearing polarized 3D glasses. A stereoscopic image combines two images that represent the views of the left and the right eye with different perspective view points. From these two slightly different views, the eye-brain synthesizes an image of the world with stereoscopic depth.

3D Multi Vision

With the new 3D display S468FL - that combines the reliability of public displays with innovative stereoscopic 3D technology - HYUNDAI IT makes it possible to bring 3D contents to large audiences. Especially its design with almost seamless bezels (only 7.3 mm; two products side-by side) and the integrated video wall function makes the S468FL the ideal display for multi-display installations.

Integrated 3D Formatter

The 3D-Formatter which is already integrated (only S468FL, S320D) makes it possible to display common 3D video formats (side-by-side, top/bottom, line alternate) without any further accessories.

3D Software Package

HYUNDAI IT's 3D display comes along with a software package of the leading 3D software supplier DDD:

- 3D Media Player
- 3D Experience
- 3D Google Earth
- 3D games driver

3D Visualizer/OpenGL driver (Option)

3D Visualizer enables selected third party applications to work on HYUNDAI IT's 3D displays. Using 3D displays and 3D Visualizer, 3D models appear to have a real physical depth, just like the actual objects they are modelling.

For more information on DDD's TriDef software please visit: <http://www.tridef.com>.

Recommended Hardware Requirements

Intel® Core 2 Duo or Athlon™ 64 X2 Dual-Core CPU, 1GB RAM, NVIDIA® GeForce 6600 or ATI Radeon™ X800, 100MB free disk space, Windows® XP, Vista (32Bit), DirectX 9.0c compatible sound card, Internet connection, DVD-ROM drive, Network card.

Side by Side format image.

Recognition of left eye's image.

Recognition of right eye's image.

Polarized glasses

Key Facts

Advantages:

- moire, ghosting and flicker free
- passive 3D glasses
- HDMI with HDCP support
- wide viewing angle

Available Sizes:

- 61.0 cm / 24"
- 116.8 cm / 46"

HYUNDAI IT's outdoor displays represent state-of-the-art display technology for any outdoor environment. By meeting highest industrial standards, they provide a high degree of operational reliability and superior image quality, which are important preconditions for attracting the attention of today's audience.

IP55 Confirmity

In order to protect the display against influences the outdoor displays meet the requirements of IP55 as basic and those of optionally.

All-Weather Capable

Fitted with an intelligent cooling and heating system, the outdoor displays are well prepared for standing any weather conditions from -40°C to +50.

Air-Looping-System

In order to protect the LCD panel against so called black-outs (black areas on the screen in the wake of overheating), the outdoor displays are equipped with a smart air-looping-system.

Sunlight-Ready

A special anti-reflection treatment reduces reflections on the display's surface.

Anti-Vandal Protection

Thanks to a special tempered security glass HYUNDAI IT's outdoor displays are well protected against any vandalism attacks.

Applicable Technologies (Options):

LED Backlight

Enables a high brightness (up to 2500 cd/m²) and reduces power consumption.

Transflective Panel

Uses the sunlight to increase the display's brightness. This enables a high brightness of up to 3000 cd/m² (at 80 lux).

Auto-Brightness Sensor

Adjusts the panels brightness automatically according to the ambient lightning conditions. This reduces power consumption and increase the panel's lifetime.

Motion Sensor

Depending on the detection of human motion in front of the screen, the display is either switched to operation or stand-by mode. This reduces power consumption and increase the panel's lifetime.

Anti-Graffiti Protection

A spevcial coating on the display allows an easy removal of colours without any damage of the display's surface.

UV Protection

A special UV filter protects the screen against ultra violette sunlight.

Power	Voltage	100-240V AC	100-240V AC	100-240V AC
	Consumption	50 Watt (typical)	230 Watt (typical)	269 Watt (typical)
Other Features	Audio System	Internal Loudspeaker 2 x 3 Watt, PC Audio In/Out	max. 10W x 2ch	ready (max. 10W x 2ch)
	Kensington Slot / Wallmount Holes	Yes Yes (VESA: 100 x 100 mm)	Yes Yes (580 x 420 mm)	Yes Yes (600 x 200 mm)
Stand	Type	Tilt /PIVOT/height-adj.	Tiltable	-
Cabinet Color		Black/White high gloss design	Black	Black
Dimensions	Unit (W x H x D)	579 x 455 x 240 mm	1143 x 831.8 x 310	1025.6x579.8x108.2
Weight	Unit (kg)	9.9	31	26
Accessories	Power cable, DVI Cable, D-Sub Cable, Audio Cable, Quick Installation guide, 3D glasses, HDMI-DVI Cable (S465D, S468FL only); CD-ROM: User manual, Driver, ICM profil 3D software package			

Open Frame

Model	D466FLPT	
Product Type	Open Frame	
Panel	Screen Size (diagonal)	54,86 cm 21,6"
	Panel Type	PVA
	Active Display Area (mm)	1018.35 x 572.54
	Resolution	1366 x 768
	Aspect Ratio	16:9
	Display Colors	16.7 M
	Brightness (Typ)	2400 (max. 3000; at 80K lux)
	Contrast Ratio	2900:1
	Response Time	8 ms
	Viewing Angle	178°/178°
	Lifetime (hours)	50,000
	Backlight Type	CCFL
	Resolution	Monitor
DTV		1080i
Input	Video	1x VGA (D-Sub) 1x HDMI 1x Composite (BNC) 1x Component (BNC)
	Audio	1x PC Audio 1x Component Audio 1x Composite Audio
Output	Video	1x VGA (D-Sub) 1x DVI (HDMI connector) w Composite (BNC) 1x Component (BNC)
	Audio	Speaker (ready)
Power	Input Voltage	100~240VAC
	Power consumption	315 W
Features	Multi-Screen Function	yes
	Remote Control	yes (over RS232C)
	Tempered Glass	yes
	Touch Screen	option
	Transflective Function	yes
	Optical Bonding	yes
	Anti Reflection Coating	option
	Auto Brightness Sensor	option
	Motion Sensor	option
	Auto Cooling System	yes
Others	Auto Power Control	
Dimension	WxHxD (mm)	1047.4 x 600.6 x 132.4
	Bezel Size	14.4/ 14.4/ 14.9/ 14.9
	Wall Mounting (WxH; mm)	600 x 200
Weight	Set (kg)	37,5
Accessories	Power Cord, Manual, HDMI Cable, Remote Control	

Interactive Whiteboard

Model	E65AMAC	
Product Type	Interactive Whiteboard	
Panel	Screen Size (diagonal)	165,1 cm 65"
	Panel Type	PVA
	Active Display Area (mm)	1428.48 x 803.52
	Resolution	1920 x 1080
	Aspect Ratio	16:9
	Display Colors	1.0737 B
	Brightness (Typ)	450 cd/m ²
	Contrast Ratio	5000:1
	Response Time	6,5 ms
	Viewing Angle	178°/178°
	Lifetime (hours)	n/a
Backlight Type	CCFL	
Touch Screen	Resolution	32767 x 32767
	Response Time (ms)	9
	Response Rate	125 rps
	Touch Accuracy (typ.)	±2mm
	Touch Method	pointer including fingers
	Interface	USB 2.0 compatible (full speed) / HID compatible / Plug & Play compatible
	Touch Intensity	over 60,000,000
Resolution	Detection Method	Infrared CMOS camera sensors
	Operating System	Windows XP/Vista/7, Linux, Mac OSX
	Monitor	1920 x 1080
Input	DTV	1080p
	Video	VGA / HDMI / Composite (BNC) / Component (BNC) / RS232C
Output	Audio	Component Audio / Composite Audio
	Video	VGA / HDMI / Composite (BNC) / Component (BNC) / RS232C
Power	Audio	Speaker (10Wx2CH)
	Input Voltage	100~240VAC
Features	Power consumption (W)	320
	Multi-Screen Function	n/a
	Remote Control	yes (over RS232C)
	Tempered Glass (option)	yes
	Anti Reflection Coating	option
	Auto Brightness Sensor	yes
	Motion Sensor	option
	Auto Cooling System	yes
	Others	Auto Power Control (DPMS)
	Dimension	WxHxD (mm)
Bezel Size		53.7 / 53.7 / 53.7 / 53.7
Wall Mounting (WxH; mm)		800 x 400, 800 x 600
Weight	Set (kg)	60
Accessories	Power Cord, HDMI Cable	

The HYUNDAI IT Story

HYUNDAI Electronics first set up a monitor division at its electronics corporation in 1984. After launching the first monochrome monitor, HYUNDAI continuously developed its product range, rapidly succeeding in expanding production to over 1 million units per year. HYUNDAI has been a leading manufacturer of TFT displays in a variety of sizes since the mid-1990s. In 2000, the monitor division parted company with the parent corporation to become what is today Hyundai IT Corp. Ltd., Korea, and associated HYUNDAI IT Europe GmbH. The company operates in-house

research, development and production facilities to guarantee cutting-edge technology at all times and maximize customer satisfaction. "We focus on providing flawless, comprehensive service and after-sales support. We will continue to focus operations according to the needs of our customers, and combine state-of-the-art technology with the highest service standards", states President of HYUNDAI IT Europe GmbH, Mr. K.S. Kim, in confirmation of the company's recipe for success.

Warranty Terms

Warranty Terms

HYUNDAI IT display products are high advanced technology products. By following international development and production standards, we always ensure the best product quality and thus high product reliability. Nevertheless, in case of any service event, we provide a fast and credible after-sales support. According to the customer needs we are providing different service levels.

SERVICE LEVEL	DESCRIPTION
STANDARD	2 years pick-up, repair & return
HOME-IN	On-Site analysis by engineer. If necessary a defective unit will be immediately replaced. Customer is free in un-installation and delivery time consumption.
PREMIUM	Wherever product is displayed, in next business day it is reworking. Warranty extension up to 5 years. Includes configuration, delivery, installation and maintenance.
