

 **Media Player 3G**

UID0382-XX1

i DISPLAY's android based media player enables you to play your media, content and applications on any screen size! The Android Media Player allows you to run content in 1080p full HD, additionally the software has been designed specifically for commercial and retail use. i DISPLAY's Android media player has embedded Wi-Fi and 3G allowing retailers and brands to easily update and upload content remotely, also enabling automatic connection to a web based, easy to use remote content management system (CMS). The media player features include content auto-play, auto-copy, auto-detect, external push button and motion sensor functionalities. Powered by Android OS i DISPLAY's Android media player is a simple and effective way to manage content in a retail environment. In addition the Media Player provides you with the flexibility to connect to external hardware such as barcode scanner, connect box and Android supported touch screens to create your own interactive experience.

Play Content on Android touch screens
