HAI OmniTouch 5.7

Technical Sheet

*Easily adjust lights, audio, spa, and much more with the OmniTouch 5.7*

The OmniTouch 5.7 is compatible with all HAI controllers, including the Omni LT, Omni IIe, OmniPro II, Lumina and Lumina Pro. The OmniTouch 5.7 comes in White, with color change kits available in Almond, Black, Ivory, Light Almond, and Silver.

The OmniTouch 5.7 (HAI part number 53A00-1) is a colorful "plug and play" Touchscreen with large icons to control lights and small appliances, monitor and adjust security and temperatures, pool and spa temperatures, ventilation, decorative lighting, Whole Home Audio Systems, surveillance video, and other items under the control of an HAI Home Control system.

- Large 5.7" LCD display using TFT technology for rich colors and improved viewing angles.

- Displays full screen video. Compatible with any CCTV camera. (Touchscreen Hub and Video Encoder necessary for video.)

- Speaker instead of beeper for more pleasing audible tones.

- A built-in USB connector that allows you to update to the newest version of firmware at any time easily and for free!

since 1985

Security

(Omni family controllers only.) Easily adjust security functions with one touch.

Arm, Disarm, set to Vacation or Away.

View an event log to see who accessed the security system and at what time.

Energy Management

View indoor and outdoor temperatures and humidity.

Adjust the heating or cooling within a room or whole house.

View humidors or wine cellar temperatures and monitor water temperature sensors.

Lighting Control

Adjust the lighting in any room.

Easily dim, setup timing sequences, or turn all lights on/off by switch, by room, or by house.

Whole Home Audio

Control Hi-Fi by HAI or an audio system from one of HAI's Connectivity Partners.

OmniTouch 5.7 emulates the NuVo, Russound, Speakercraft, Proficient, and Xantech audio keypads for a sleek, clutter-free appearance with full functionality. (See HAI Connectivity Partners for exact models.)

Status

One touch gives you the status of the home's security, temperatures, lighting, and energy usage.

Surveillance Video

View full screen video feed from cameras directed at the front door, the pool, the nursery, etc.

Press the camera selection button to release a door strike and let your visitor inside!

Buttons

Buttons are a way to quickly initiate a chain of commands, or to initiate a function that is not already assigned an icon.

Have a "Water Lawn" button to turn on the sprinkler system.

Or have a "Romantic Evening" button to drop the shades, turn on the whole home audio system, dim the lights, and activate other features controlled by an HAI home control system.

OMNITOUCH 5.7 PARTS LIST

Touchscreens: Description	Part #	Accessories: Description	Part #
