

musicmate entertainment server

An incredible opportunity is coming your way!!!

The world renowned XiVA™ brand, responsible for the market's best selling internet connected media appliances, is pleased to announce its next offering, the XiVA™ musicm8 (musicmate), a lower cost, rip, store and stream product, aimed to get the best out of other class leading streaming products in the consumer marketplace, such as the Sonos system, Logitech Squeezebox and Linn DS.

The XiVA™ musicm8 is designed to highlight technical and engineering expertise that gels extensive functionality with a simple, effective end user experience.

This is not a Custom Install (CI) oriented product, but a Consumer Electronics (CE) based product, and should be seen as an opportunity to introduce core CI values to your retail based business propositions. Adding CI core values such as quality tier 1 manufacturing, dedicated telephone support, experienced technical backup, and class leading customer service takes value add to a whole new level.

The XiVA™ musicm8 (musicmate) is an advanced, dedicated entertainment server, that provides a great way to store your precious music collection, photo memories, movie clips and more.

Use the musicm8 with your favourite music streaming product to play music wherever and whenever you want it, then browse your photo and video collection effortlessly via a web browser.
