CF181D

# The future of home entertainment CF181D

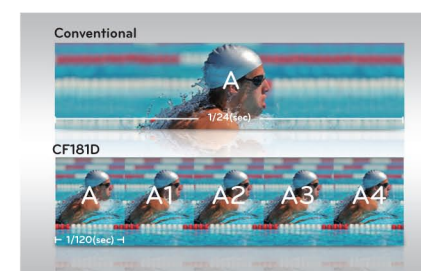

LG CF181D is a SXRD system projector using LCoS, an innovation that has strengths and advantages of both DLP (high contrast ratio) and LCD (superb color impression) technology. With the high response time of 2.5ms, LCoS technology provides amazingly sharp and detailed picture quality even in scenes with fast motions.

### Realistic picture quality

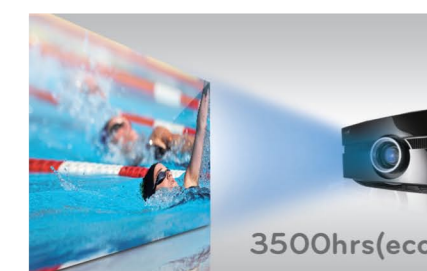

CF181D Full HD home entertainment projector applies the upgraded 120Hz TruMotion technology that repeats motion compensation frames to reproduce natural images without breakup. With 35000:1 high contrast ratio and 1800 ANSI-lumens superior brightness, CF181D displays vivid and clear pictures even for light images with bright backgrounds.

### Extended long lamp life

With optimal lamp control, the projector has a long life span ranging from 3000hrs to 3500hrs (Eco). As a result, you can enjoy clear pictures longer and the extended lamp replacement cycle reduces maintenance cost.

### Premium style & low noise

Featuring a smooth black body and gleaming blue lights, CF181D has a premium design that accentuates your space. Moreover, the projector creates an ideal environment for enjoying movies by reducing noise level to 23dB (Eco) through vibration minimization.
