PHILIPS

It's your home, your choices and your style.

The sensational looking Philips Pronto gives you complete control of your AV entertainment, lighting and on-line music throughout your entire home. So why not complement it with the comfort, convenience and control that Philips Pronto brings.

Personalized convenience

Pronto's ergonomic design, with a button layout for both one- and two-handed control, features a full VGA screen that is easy to see, read and control from any angle. The display's superb contrast, vivid colors and high pixel density show channel icons, images and text in stunning detail. 'Soft-touch' paint and a stylish docking station with subtle lighting, give Pronto a unique look and feel.

Ultimate simplicity

The fully customizable graphical user interface matches your personal taste and preferences. To simplify operation, Pronto works with 'activities' rather than individual pieces of equipment. So if you want to 'watch a movie', you simply activate it with one touch or one button. No need to activate separate units, and no getting lost in complex menus!

Reliable home control

With full multi-room operation, you are in control of your home entertainment both in and around the house. It controls hidden equipment (in cupboards) and equipment in other rooms. A long battery life per recharge ensures reliable operation, while exclusive system feedback information guarantees problem-free system use for many years.

Music, mood and ambiance

Pronto operates all IR-controlled AV equipment and provides wireless control throughout your entire home in combination with ultra-reliable WiFi® extenders. It also operates a music server (Escient Fireball) and lighting (Lutron RadioRa) with full onscreen feedback. It is easily expandable too, so you can update it as new functions become available.

Pronto brings you

- Total home entertainment control
- Intuitive user interface that works in terms of activities rather than pieces of equipment
- Works with every brand and model of equipment, and can 'learn' codes not included in its code library
- New home control functions - Escient Fireball Media Servers and Lutron RadioRa lighting control
- Perfect for controlling multi-room installs and equipment built into cabinets or furniture
