

Focus DTE Recorders work with any camera that has a FireWire (IEEE-1394) connection and will record in the popular file formats that are offered on most DV and HDV cameras. For cameras that record in proprietary native file formats, such as Canon, JVC, and Panasonic, Focus offers manufacturer-specific models.

Q: Will my camera work with a Focus DTE Recorder?

A: If your camera has a FireWire (IEEE-1394) connection, and it supports a popular DV or HDV file format, it will work with a Focus DTE Recorder. If you have a camera that uses a proprietary native file format, Focus offers manufacturer-specific models.
